

EDUCATION & TRAINING

Ecolateral offers a practical and experience based approach to training organisations and individuals in sustainable design and construction. Building on the basic principles of sustainability, our trainers and training courses also address building science, land appreciation, material performance, solar passive design, waste management, water and energy rationalisation and marketing opportunities.

Drawing on our expert knowledge, academic qualifications and practical experience, customised courses can be designed and written to address the specific needs of each organisation.

We have provided Training and Education for the following organisations:

Organisation	Course
Construction Skills Queensland	Environmentally sustainable work practices
Ergon Energy	Sustainable energy
Housing Industry Australia	GreenSmart - energy efficiency in domestic construction
Urban Development Institute of Australia	EnviroDevelopment training
Queensland Department of Housing	Triple bottom line delivery in housing
South Bank TAFE	Vocation graduate certificate in Environmentally Sustainable Building

Why Ecolateral?

Ecolateral Director, John Moynihan has been training the construction industry in all aspects of sustainability for over twenty years. He is the author of a number of training programs, including HIA's GreenSmart program, which is the foremost training tool for the Residential Construction Industry in Australia.
